N5 SMART SERIES

Talkpod

The Talkpod N5 Smart Series has been specifically designed for the Australian market.

Each model carries the Regulatory Compliance Mark (RCM) and utilises all 3G/4G bands found in Australia. All models roam seamlessly between Wi-Fi and 3G/4G/LTE networks to provide a larger, faster, stronger and more reliable coverage area. Additionally, all N5 series variants are equipped with GPS & Accelerometer Sensors, enabling real-time tracking and emergency management options. The open-source Android operating system supports many Push-to-Talk platforms with little or no development required.

N50

The Talkpod N50 Push-to-Talk over Cellular handheld radio is equipped with the open source Android 9.0 operating system providing platform flexibility enabling users to stay connected by utilising Push-to-Talk technology. The N50 is a mid-tier PoC rugged portable with an optional IP67 water and dust proof rating version, making it perfect for daily use in harsh and unforgiving environments.

N56

The Talkpod N56 features a 1.7", high-resolution, full-colour LED display and limited keypad for fast & easy operation. Clear text, icons and large, easy-to-use navigation buttons make reading messages and menus a breeze. Push-to-Talk platforms can deliver more functionality and user interaction with the N56 utilising its LED display and customisable side keys.

N59

The N59 further increases functionality and interaction, forming an advanced user experience. Front and rear facing cameras, 2.4" full-colour touch screen display and Android 9.0 operating system combine with clear audio, exceptional durability and excellent security - the N59 defines a new era of communications.

N86

The Talkpod N86 is a mid-tier public network in-vehicle two-way radio enabling Australia-wide coverage via LTE/4G and private networks. The N86's sleek yet simple design is welcomed by all and delivers a stable in-vehicle two-way radio PoC experience that's easy to operate. The N86 has crystal clear, loud audio and a comfortable, 'in-hand' fist microphone. Like all Talkpod PoC devices, the N86's industry-leading ability to roam cellular sites, vote for the best usable signal at speed and select the best bandwidth to deliver the optimal level of service, is outstanding.

Choose from a variety of Talkpod accessories that have been designed, tested and certified to optimise the performance and efficiency of the N5 Smart Series.

Talkpod

We recommend using only genuine Talkpod accessories for the best user experience.

Included Accessories

Each Talkpod N5 Smart Series handheld radio comes packaged with everything you need to get started, including a Li-Ion battery pack, belt clip, antenna, wrist strap & single unit charger.
